

AUTONOMOUS REVENUE OS™

The Complete *Pitch Playbook*

ROI · Cold War Method · NLP Tech Boss Close · Live Payment Links

Prepared by Elizabeth Rothchild

Confidential · For Client Use Only

Section 1 — The ROI: Plain Math

Traditional Sales Hire	Autonomous Revenue OS
\$4,000 / month minimum	\$497 / month
8 hours/day, 5 days/week	24 hours/day, 7 days/week
Gets tired, quits, gets sick	Never stops, never complains
First customer: 60–90 days	First outreach: same day
Average tenure: 14 months	Runs forever

"A salesperson costs \$4,000 a month and sleeps 8 hours a night. This costs \$497 and never sleeps."

BREAK-EVEN MATH

If your average client is worth \$2,000 — you need just ONE new customer every 4 months to break even.

Most users see their first warm conversation within 72 hours.

That's an 8× ROI on the low end.

TIMELINE TO RESULTS

Timeframe	What Happens
Day 1	System live, first messages sent
Day 3	First replies coming in
Week 2	10–20 warm conversations in pipeline
Month 1	First new client closed from the system
Month 3	Revenue growth covers subscription 6× over

Section 2 — The Cold War Method

Built on two Cold War principles: create the threat, offer the escape.

THE MESSAGE (WHATSAPP / SMS / DM)

Hey [Name] — quick one.

I've been watching what's happening to founders right now. Costs are up. Attention spans are gone. The reps who used to close? Expensive and slow.

Every day without automated outbound, your competitors are taking conversations you should own.

*I'm only onboarding 3 clients this week. If you want the last spot:
<https://buy.stripe.com/6oUaEX18sbW9gE5a2GaR202>*

Takes 60 seconds.

WHY IT WORKS

Step	Principle	Effect
Establish the threat	MAD Doctrine	Fear of being left behind
Make inaction costly	Arms Race Pressure	Time passing = falling behind
Offer the escape hatch	The Peace Deal	Link = instant relief
Scarcity close	Limited seats	"3 clients" = real urgency

Section 3 — Tech Boss NLP Pitch

A Tech Boss thinks in systems, not people. He trusts logic over emotion.
Win him by showing the gap in his system — then becoming the solution.

MIRROR HIS IDENTITY

"You're already thinking in automation. You've probably built half of this yourself at some point — or thought about it."

TRIGGER: CONTROL

"Most revenue tools take control away from you. They're black boxes. This one puts the entire system in your hands — every lead, every message, every result is logged and trackable."

TRIGGER: LEVERAGE

"One person — or no one — is doing what this system does for 100 companies simultaneously. That's leverage. The same principle you use in your code, applied to revenue."

TRIGGER: INTELLIGENCE

"It doesn't just send messages. It learns which ones land. It tracks responses, adapts, and feeds you the signal — not the noise."

TRIGGER: FIRST

"The people in your space who adopt this in the next 90 days will have a 6-month head start. You already know how compounding works."

THE FAMILY CLOSE

"I'm building a community of founders who refuse to do revenue the old way. I want you at the table. Not just as a client — as someone who helped shape what this becomes."

THE SILENCE CLOSE

After your last line — stop talking. Don't fill the silence.
The next person who speaks loses leverage. He will speak.
When he does, he's already half-closed.

Section 4 — Live Payment Links

These are live Stripe links. Anyone who clicks can pay immediately — no app or account needed.

GROWTH — \$99/month
